

Dr. Lee A. Norman serves as the State Surgeon of Kansas where he guides medical troop sustainment and training, health services support, force health protection, biosecurity, and he serves as an advisor and liaison to emergency management and Homeland Security elements. Dr. Norman received his medical degree from the University of Minnesota, did his residency in family medicine, and his aerospace medicine training in the U.S. Air Force at Brooks Air Force Base in San Antonio. Dr. Norman has served as a chief medical officer for more than 20 years, most recently in the University of Kansas Health System, and before that in the Swedish Health System in Seattle. Dr. Norman also has two master's degrees – one in health planning and systems analysis from the University of California, Davis School of Medicine, and an executive MBA degree from the University of Washington Graduate School of Business.

This lecture was part of the CGSC Foundation's Simons Center for Interagency Cooperation "Distinguished Speaker Series." The lecture series is an extracurricular, educational lecture series that is intended to help enrich the CGSS curriculum much like the Interagency Brown-Bag Lecture Series, but with a broader focus. The CGSC Foundation and the Simons Center have received support for all distinguished speakers in academic year 2018 from Park University along with previous contributions from the Perot Foundation.

## **Ambassador McCarthy returns as DACOR Visiting Professor**

Retired Ambassador Deborah McCarthy returned for a second visit to Fort Leavenworth in April, again serving as the DACOR visiting professor of diplomacy for the U.S. Army Command and General Staff College (CGSC) Class of 2018. McCarthy, who served as the U.S. Ambassador to Lithuania from 2013 to 2016, visited Fort Leavenworth 16-19 April 2018. She previously visited in December 2017.

During her visit to the area, Ambassador McCarthy guest lectured on "Women and Politics" at the University of Kansas. On April 17, Ambassador McCarthy met with 20 undergraduate students and discussed her service and career as a Foreign Service Officer. Ambassador McCarthy also spoke about U.S. policies and programs that deal specifically with women in foreign countries, as well as State Department programs and opportunities for women.

While at KU, McCarthy also took part in brown-bag presentation for KU's International Studies program, meeting with faculty and both graduate and undergraduate students. There, McCarthy discussed U.S. policy, Department of State operations, and Foreign Service Officer career opportunities as part of the Intelligence Community Center for Academic Excellence Scholars program.

For the remainder of her time at Fort Leavenworth, Ambassador McCarthy visited with students at the U.S. Army Command and General Staff College (CGSC). Over the two day period, Ambassador McCarthy met with over 80 CGSC students in five different elective courses discussing a variety of issues to include diplomacy, the Department of State, the role of an ambassador, national security policy, NATO, European, and Baltic region security concerns, economic policy, and terrorism.

Ambassador McCarthy finished her visit to the College with a brown-bag lunch with the Department of Joint, Interagency, and Multinational Operations (DJIMO), meeting with 18 DJIMO faculty members, including department chair Colonel Juan Ulloa.

The DACOR Visiting Professor of Diplomacy Program is conducted in partnership with the Diplomatic and Consular Officers, Retired, Inc. (DACOR) organization located in Washington

D.C., and the U.S. Army Command and General Staff College Foundation. The DACOR Visiting Professor of Diplomacy program for academic year 2018 has been made possible with support from the University of St. Mary and Park University.

## **Global health security team disbanded**

Rear Admiral R. Timothy Ziemer has left the National Security Council (NSC) and the global health security team he oversaw has been disbanded. Ziemer, described as “one of the most quietly effective leaders in public health,” was the Trump administration’s senior director for global health security and biodefense at the NSC, and he will not be replaced.

The move to dissolve the global health security team comes from national security advisor John Bolton on the same day that a new Ebola epidemic was declared in the Democratic Republic of the Congo. While a spokesman stated that the NSC “remains committed to global health, global health security and biodefense,” there are concerns that Ziemer’s departure and loss of the global health security team leaves the U.S. at increased risk of pandemic or bioterrorism attack.

J. Stephen Morrison, senior vice president at the Center for Strategic and International Studies, spoke on the subject, saying that “Health security is very fragmented, with many different agencies,” and that “means coordination and direction from the White House is terribly important.”

## **USAID, State, DoD to release Stabilization Assistance Review**

An interagency review of U.S. government stabilization efforts is expected as early as this month. The Stabilization Assistance Review (SAR) examines how the State Department, U.S. Agency for International Development (USAID), and Department of Defense (DoD) coordinate their diplomacy, aid, and military operations, primarily in Syria and Iraq.

A State Department official spoke of the SAR, saying “The SAR establishes a U.S. government-wide definition of stabilization as a political endeavor to create conditions where legitimate authorities and systems can manage conflict and prevent violence.”

According to a DoD spokesperson, “The SAR specifically outlines steps to establish a State Department-led interagency process for developing political strategies for all future stabilization engagement,” and will allow DoD, State, and USAID to take advantage of each other’s efforts to stabilize conflicted areas.

“Our success — USAID’s success — depends upon the success of the State Department in mobilizing international resources in their role, but also, of course, DoD helping us to have access and security. Without their success, we can’t possibly do what it is that we seek to do,” said USAID Administrator Mark Green.

Work on the SAR began in May 2017. State, USAID, and DoD – in consultation with the National Security Council – conducted research throughout 2017, finalizing the SAR in December. The SAR was distributed to congressional committees for review in April of this year and is expected to be publicly released shortly.
